

NOTE FOR MR. WARNER:

Several recent items in the press have indicated that it is very doubtful that the amendments to the FECA will be acted upon in the Senate this year. These articles also express some skepticism as to whether they will be acted on by the House. A review of the membership of the Senate Labor and Public Welfare Subcommittee shows the names of several members with whom we are close or at least have some contact. I would suggest that on the basis of "targets of opportunity" those of us who have contacts with these members bring up the subject of the FECA amendments. As for instance, you might mention this to Senator Ted Kennedy on Monday if you have an opportunity. Other members who might be approached are Senator Wayne Morse, Senator Yarborough, Senator Gaylord Nelson, Senator Robert Kennedy, Senator Javits, Senator Dominick, and Senator Murphy. As  indicates there is no union for lobby which represents BEC beneficiaries. Perhaps we will have to be the moving party in the Senate as well as in the House.
